# Imágenes de dorso

@preparandoanato

#### ¿cómo vamos a dividir la clase?

#### Por regiones:

Región cervical

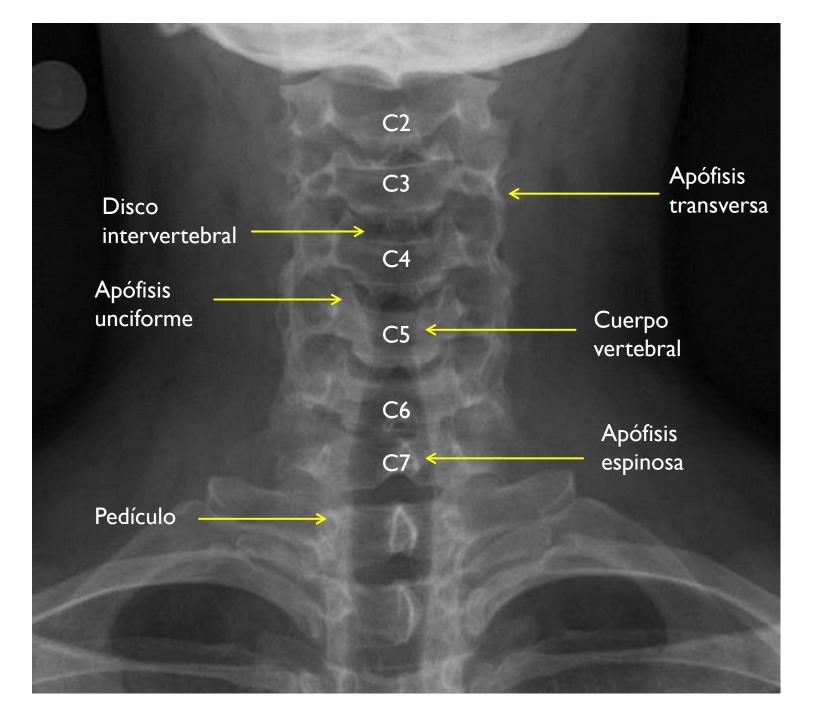

Región torácica

Región lumbar

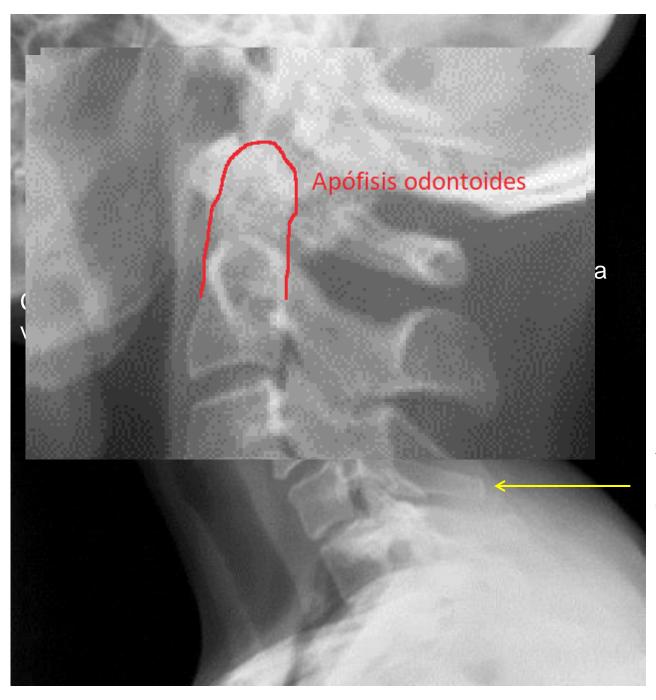

Y de cada región los distintos tipos de estudio: radiografías, tomografías y resonancias

# REGIÓN CERVICAL

Apófisis prominente de C7

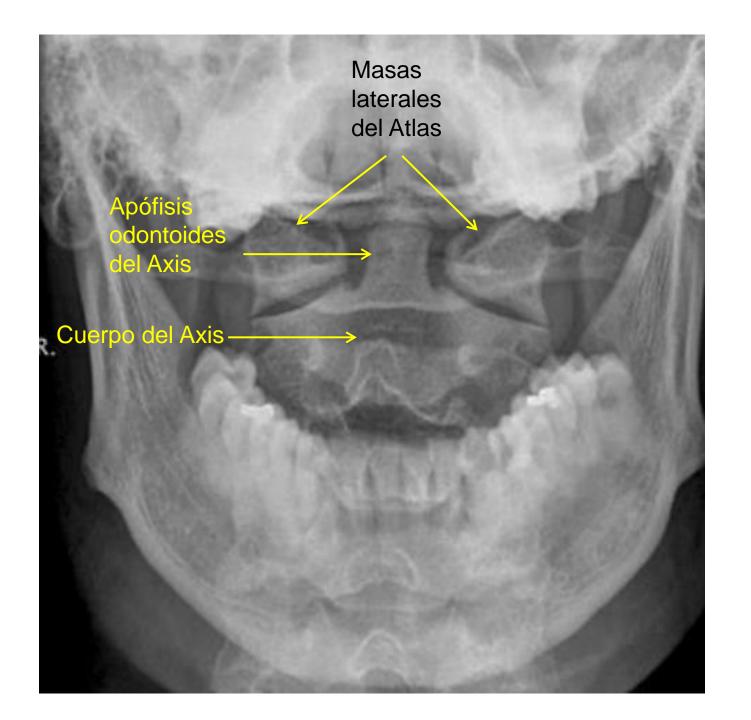

### Una proyección especial

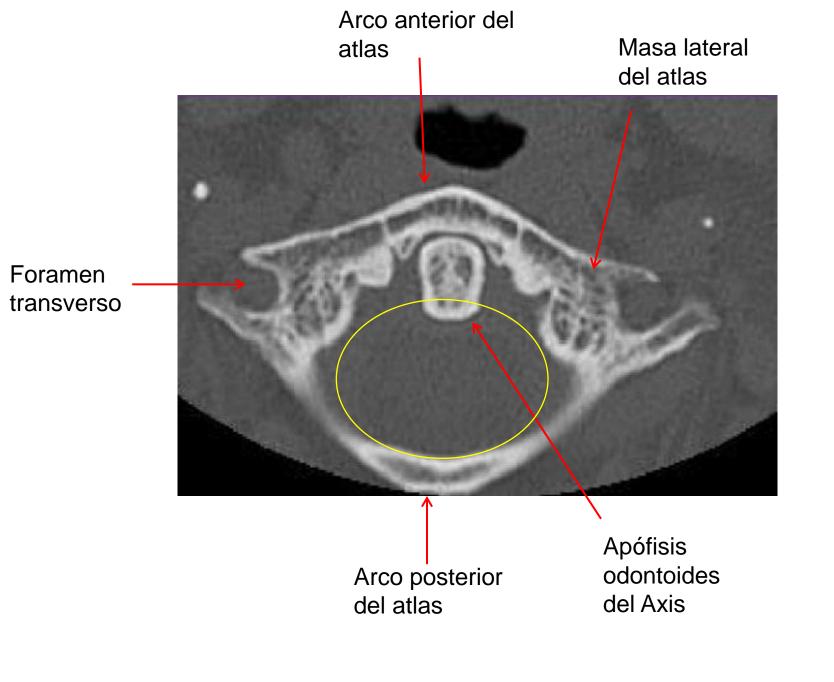

#### Mentonasoplaca

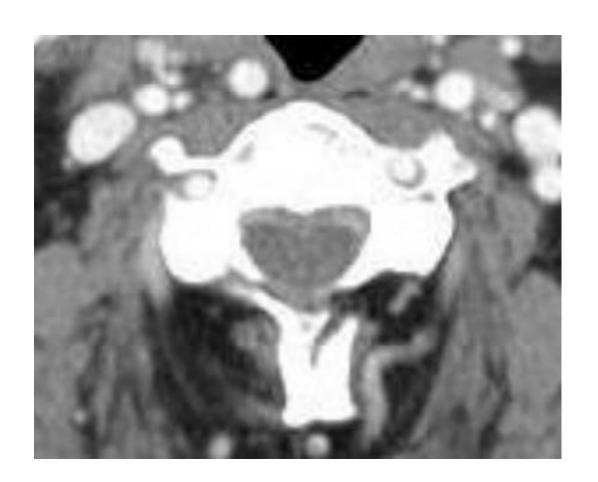

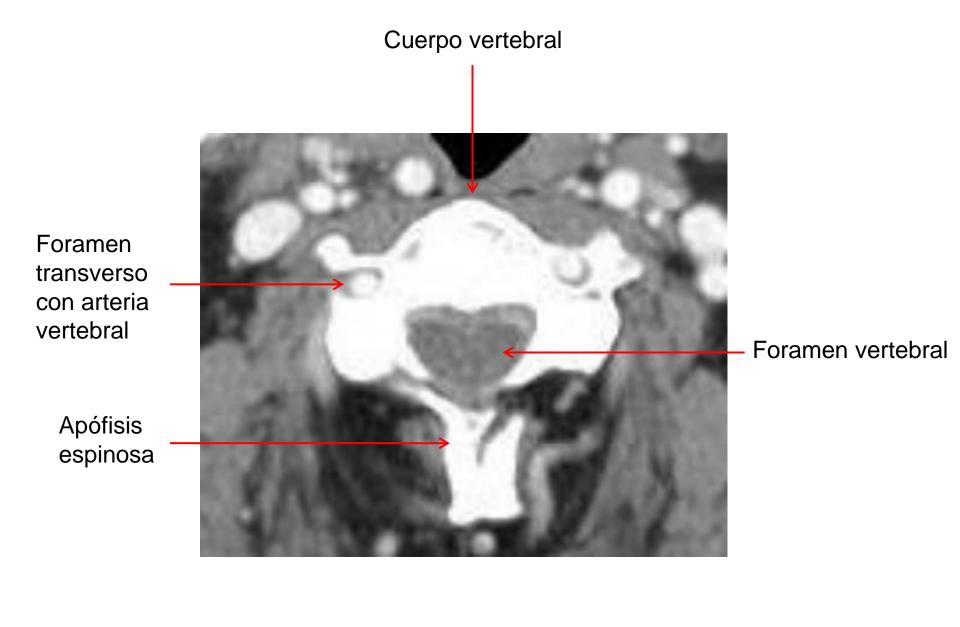

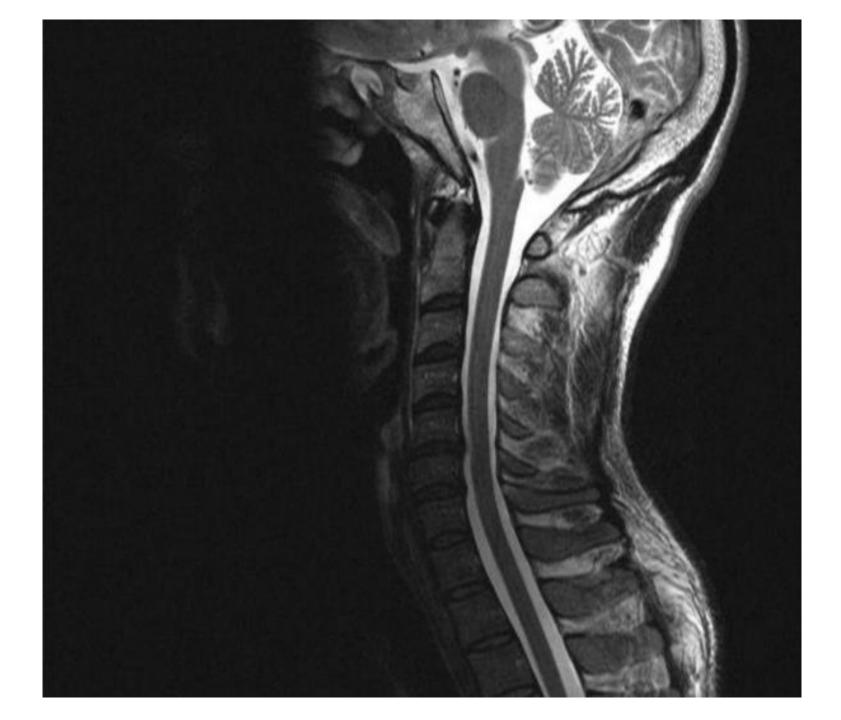

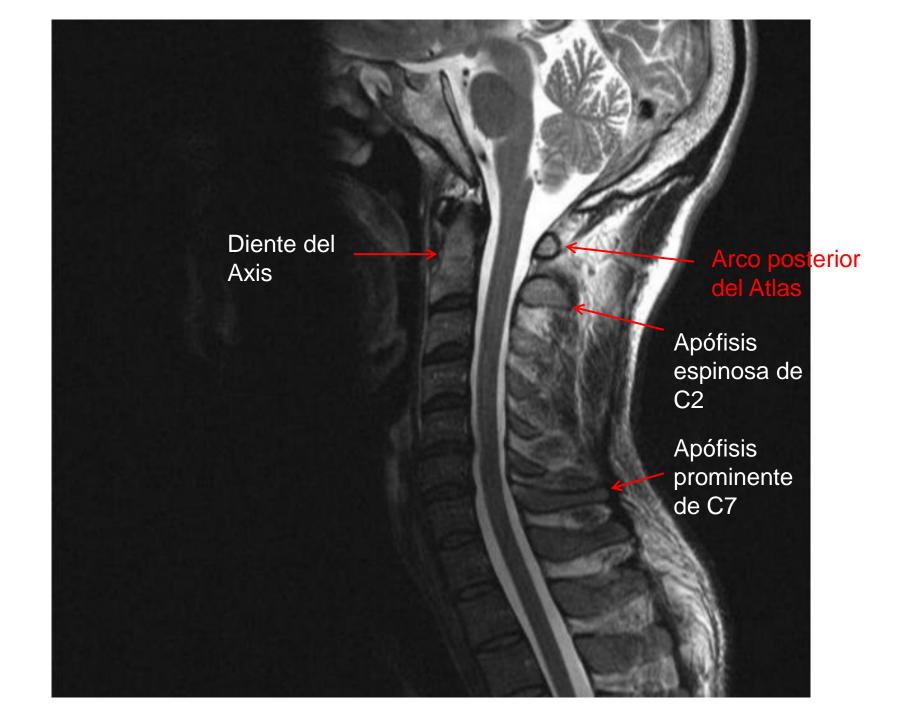

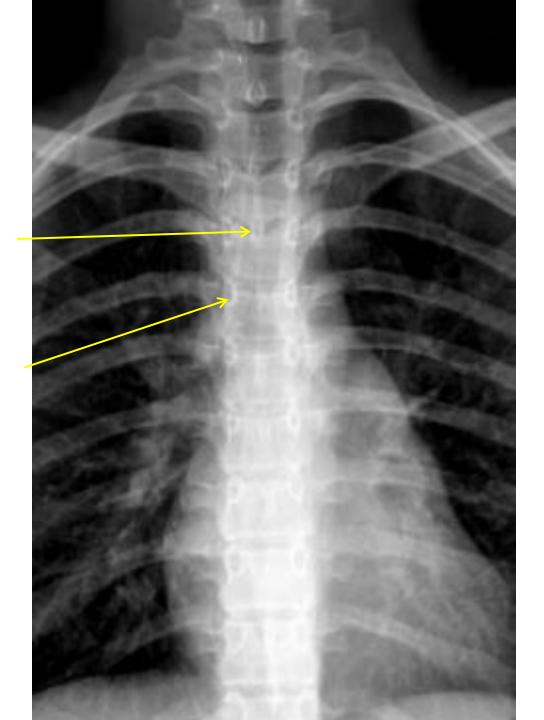

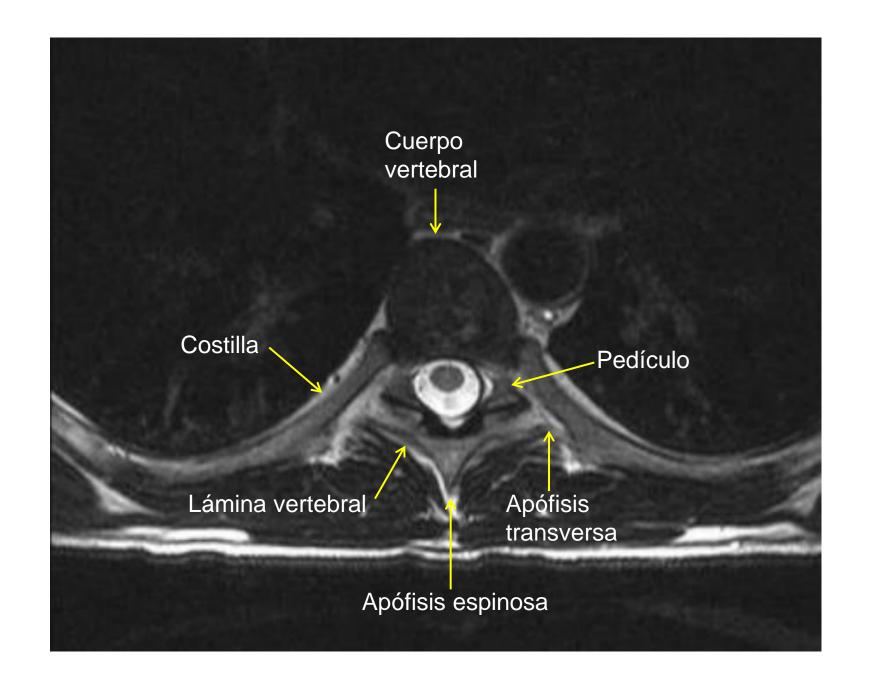

# REGIÓN TORÁCICA

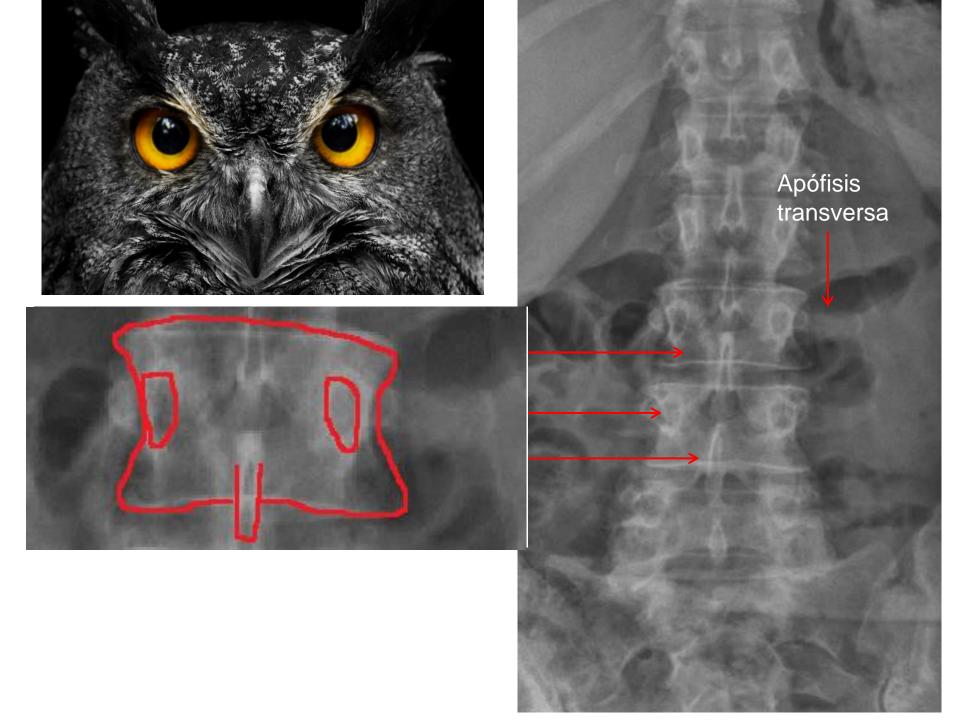

# REGIÓN LUMBAR

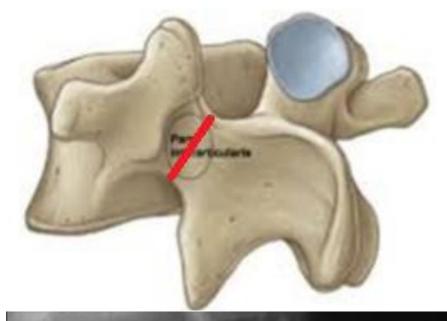

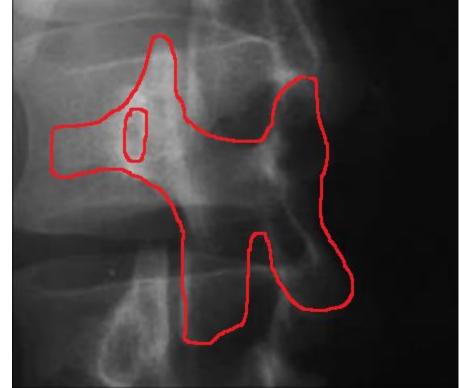

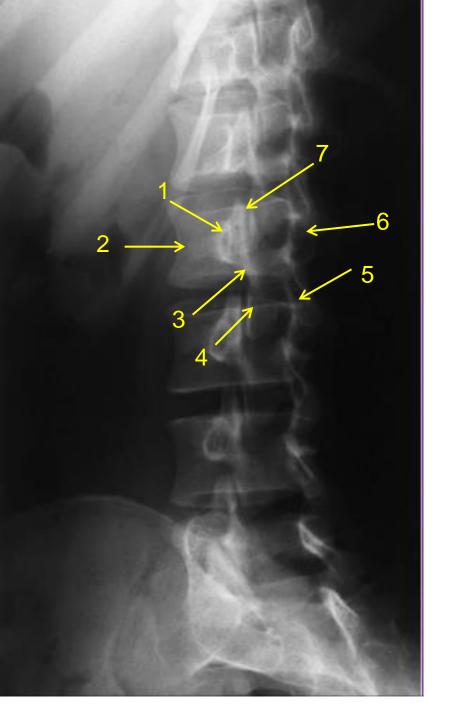

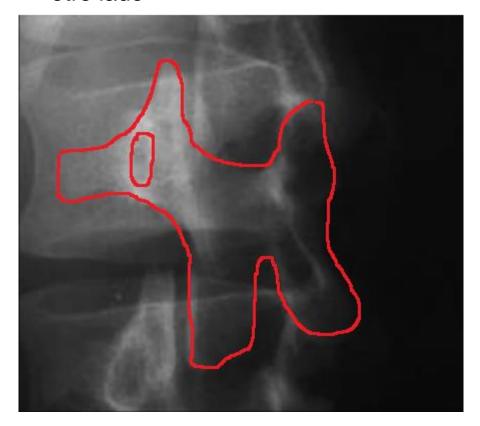

- •1 Pedículo
- •2 Apófisis transversa
- •3 PARS INTERARTICULARIS
- •4 Apófisis articular inferior
- •5 Apófisis articular inferior del otro lado
- •6 Apófisis articular superior
- •7 Apófisis articular superior del otro lado
